Developed specifically for those laboratories that have a higher demand for platelets, this incubator has been built to the high quality you would expect from Labcold, and meets and even exceeds the standard demanded by the MHRA and BSQR.

Like the rest of the Labcold Blood Product Storage range this incubator is a certified medical device in accordance with EU Directive 93/42/EEC.

Simulated load alarm

Hygienic, easy to read display and controller

This incubator has enough capacity to hold up to two Labcold flatbed Platelet Agitators (model number AGIT006MD) with either a 6 or 8 tray rack.

The incubator features a motion sensor alarm to alert you of agitator failure and for extra safety is designed to automatically stop the agitator from moving when the door is opened and resume motion when the door is shut.
